Index to Articles

Volume 44
The Science Teacher
January-December 1977

This alphabetical index to articles includes listings by author and title.

Author Index

Adams, James H. *Fizz Without Fizzle–Putting Method Into Madness.* February: 37. (Classroom Ideas)

Alexander, Duane. *Biomedical and Behavioral Research–Walking a Thin Line.* January: 24. (Science/Society Case Study)

Apfel, Robert E. *Resounding Facts on Hearing Loss.* November: 31.

Ashley David C. and Kent W. Thornton. *Making a Game of Population Genetics.* March: 45. (Classroom Ideas)

Bates, Gary C. and Fletcher G. Watson. *Measuring the Distance to the Moon by Parallax.* April: 32.

Ben-Peretz, Miriam, F. Michael Connelly, Menahem Finegold, and Merlin W. Wahlstrom. *TOTSI Matches Teacher to Curriculum.* February: 24.

Bent, Henry A. *Entropy and the Energy Crisis.* May: 25.

Berger, J. Joel. *In Gratitude . . . 250 Years of Light.* March: 28.

Butcher, Frank. *Chemistry Scavenger Hunt.* October: 46. (Classroom Ideas)

Chillag, I. and Y. Shadmi. *Developing the Concept of Mass.* September: 18.

Cobes, Jon and Shirley Heck. *Lesson Plan Tree.* January: 40. (Classroom Ideas)

Connelly, F. Michael, Menahem Finegold, Merlin W. Wahlstrom, and Miriam Ben-Peretz. *TOTSI Matches Teacher to Curriculum.* February: 24.

Cravens, Hamilton. *The Role of Universities in the Rise of Experimental Biology.* January: 33.

Crawley, Frank E. and Julie P. Sanford. *What's It Good For?* April: 25.

Demchik, Michael J. *From the Little Acorn. . . .* December: 31. (Classroom Ideas)

Eckholm, Eric. *Arid Lands.* November: 38. (Science/Society Case Study)

Egan, Patrick J. *Paleoclimatology: Divining the Future From the Past.* December: 16.

Evans, Gary W. *Trace Elements: The Little Things That Count.* April: 29.

Evans, Thomas P. *Deciding the Future of Our Discipline.* December: 28.

Finegold, Menahem, F. Michael Connelly, Merlin W. Wahlstrom, and Miriam Ben-Peretz. *TOTSI Matches Teacher to Curriculum.* February: 24.

Fitzpatrick, Karen. *So You're Going To Be A Supervising Teacher.* October: 22.

Fox, Michael W. and M. Andrea Ward. *Are Science Fairs Fair to Animals?* September: 31. (Forum)

Goodenough, Judith, Gregory F. Williams, and John D. Palmer. *The Biological Clock: Regulating the Pulse of Life.* May: 31.

Goodstein, Madeline P. and Lawrence Kershnar. *The Poor Teacher's Hand Vacuum Pump.* February: 36. (Classroom Ideas)

Grove, Cornelius Lee. *Beyond Words: A Closer Look at Cross-Cultural Communication.* November: 23.

Haney, Richard E. *Issues in Teaching Metric (SI).* November: 26.

Hassard, Jack. *Synergy: People Power for the Classroom.* April: 18.

Heck, Shirley and Jon Cobes. *Lesson Plan Tree.* January: 40. (Classroom Ideas)

Herron, J. Dudley. *Declining Enrollments: Here Are the Facts. Where Are the Answers?* January: 26.

Herron, J. Dudley. *Implicit Curriculum–Where Values are Really Taught.* March: 30.

Hindin, Wendy B. *Wingless Victory? Evolutionary Pathways.* March: 44. (Classroom Ideas)

Hoff, Darrel B. *How Big is Your Share of the Ecosphere?* November: 42. (Classroom Ideas)

Hounshell, Paul B. and Robert Lagemann. *Picking Up on Litter.* March: 44. (Classroom Ideas)

House, Peggy A. *Individualization–What Is It Really?* January: 20.

Inversin, Allen R. *Does 'Suction' Pull?* February: 38. (Classroom Ideas)

James, Robert K. *Which Freezes First, Hot or Cold Water?* January: 39. (Classroom Ideas)

Jaus, Harold H., Gerald H. Krockover, Robert D. McFrye, and Leslie L. Ray. *Getting Together: A K-12 Inservice Program.* May: 35.

Jones, Hudson C. and Gerald C. Llewellyn. *"Sign" Language for Safety.* December: 26.

Kadar, Agnes and Barbara Shupe. *Science: A History of Woman's Work.* April: 38.

Kelly, John. *Life on a Log.* September: 36. (Classroom Ideas)

Kennard, Colin. *A Cube for Teaching Structural Chemistry.* September: 37. (Classroom Ideas)

Kershnar, Lawrence and Madeline P. Goodstein. *The Poor Teacher's Hand Vacuum Pump.* February: 36. (Classroom Ideas)

Krockover, Gerald H., Harold H. Jaus, Robert D. McFrye, and Leslie L. Ray. *Getting Together: A K-12 Inservice Program.* May: 35.

Krockover, Gerald H. and Thomas D. Odden. *Remote Sensing Simulation Activities for Earthlings.* April: 42. (Classroom Ideas)

Kuczma, Philip A. *Physics of an Amusement Park.* May: 20.

Lagemann, Robert and Paul B. Hounshell. *Picking Up on Litter.* March: 44. (Classroom Ideas)

Lawlor, Elizabeth P. and Francis X. Lawlor. *Scientific Anomaly and Raisins in the Fizz-Water.* April: 44. (Classroom Ideas)

Lawlor, Francis X. and Elizabeth P. Lawlor. *Scientific Anomaly and Raisins in the Fizz-Water.* April: 44. (Classroom Ideas)

Lehman, James D. *Practical Seismograph Tracks Tremors.* November: 43. (Classroom Ideas)

Levi, Herbert W. *Caught in the Intrigue of Spider Orb-webs.* January: 16.

Leyden, Michael B. *Retelling the Barometer Story.* March: 26.

Llewellyn, Gerald C. and Hudson C. Jones. *"Sign" Language for Safety.* December: 26.

Macbeth, Douglas R. *Delaware Science Olympiad.* December: 22.

Mandell, Alan and Patricia Orr. *Predator-Prey Simulation Game.* May: 44. (Classroom Ideas)

May, Jeffrey. *Personalized Self-Instruction at the Cambridge School.* January: 22.

Moore, Elizabeth A. (See *Science/Society Case Study.*)

Moore, John W. (See *Science/Society Case Study.*)

Morris, Daniel Luzon. *Be Rigorous? . . . or Teach!* December: 21. (Forum)

McCormack, Alan J. *Letting in the Lateral: New Outlooks in Creativity.* October: 30.

McFrye, Robert D., Gerald H. Krockover, Harold H. Jaus, and Leslie L. Ray. *Getting Together: A K-12 Inservice Program.* May: 35.

Newman, Patricia A. *Cancer and the Environment: A Look at Nationwide Patterns.* February: 20.

Nolan, William T. *Energy Choices for Consumers.* December: 32. (Classroom Ideas)

Odden, Thomas D. and Gerald H. Krockover. *Remote Sensing Simulation Activities for Earthlings.* April: 42. (Classroom Ideas)

Olsen, Richard W. *Ames Window Tunnel: Appearance vs. Reality.* March: 47. (Classroom Ideas)

Olsen, Robert C. and Fred L. Tobiason. *From Broken pH to Useful Redox Electrode.* April: 43. (Classroom Ideas)

O'Neill, Gerard K. and Ginie Reynolds. *Habitats in Space.* September: 22.

Orlich, Donald and Richard L. Williams. *Simulated Astro-Photography: A Sky for All Seasons.* May: 46. (Classroom Ideas)

Orr, Patricia and Alan Mandell. *Predator-Prey Simulation Game.* May: 44. (Classroom Ideas)

Palmer, John D., Gregory F. Williams, and Judith Goodenough. *The Biological Clock: Regulating the Pulse of Life.* May: 31.

Perkins, Raymond D. *European Science Museums—A Summer Sampler.* April: 22.

Peterson, John E. *"Black Magic": Pepper in a Magnetic Field.* December: 32. (Classroom Ideas)

Pryde, Lucy T. *Ethylene Oxide: Assessing the Risks.* May: 40. (Science/Society Case Study)

Ray, Leslie L., Gerald H. Krockover, Harold H. Jaus, and Robert D. McFrye. *Getting Together: A K-12 Inservice Program.* May: 35.

Reynolds, Ginie and Gerard K. O'Neill. *Habitats in Space.* September: 22.

Riban, David M. *Extended Field Studies in Secondary Science.* March: 23.

Riddle, Mark. *In Wildness. . . .* February: 31. (Science/Society Case Study)

Rowe, Mary Budd. *Teachers Who Care.* May: 37.

Rowe, Mary Budd. *Why Don't Blacks Pick Science?* February: 34.

Royce, George and James Shank. *Calculators in the Classroom.* October: 23.

Sadler, William W. *Kinetics Teaching Model.* November: 41. (Classroom Ideas)

Samples, Bob. *Maintaining a Love Affair with Earth.* September: 30. (Forum)

(Continued on p. 58)

Sanford, Julie P. and Frank E. Crawley. *What's It Good For?* April: 25.
Seale, Dianne. *Polliwogs in the Scheme of Things.* September: 16.
Sears, Carolynn R. *Endless Circle Investigation Introduces Processes of Science.* April: 45. (Classroom Ideas)
Shadmi, Y. and I. Chillag. *Developing the Concept of Mass.* September: 18.
Shafer, Larry E. *Pistols Resolve the Difference: Mass and Weight Back to Back.* October: 45. (Classroom Ideas)
Shank, James and George Royce. *Calculators in the Classroom.* October: 23.
Shebesta, Donald F. *Teaching for Safety.* October: 26.
Shupe, Barbara and Agnes Kadar. *Science: A History of Woman's Work.* April: 38.
Silver, Jerome and Lawrence G. Silver. *Learning About the Mole.* May: 45. (Classroom Ideas)
Silver, Lawrence G. and Jerome Silver. *Learning About the Mole.* May: 45. (Classroom Ideas)
Smith, Robert D. *Nomographs for the Number-Shy.* January: 38. (Classroom Ideas)
Snyder, P. B. *Discovering Foraminifers on Ancient and Modern Beaches.* October: 44. (Classroom Ideas)
Spooner, William E. *Energy Is for the Birds, Too!* September: 34. (Classroom Ideas)
Staver, John R. *Teaching Bonding with Cuisenaire Rods.* September: 36. (Classroom Ideas)
Stechholz, Myra. *Safety-wise.* November: 46.
Stewart, David M. *Earthquakes: Predictable Disaster?* October: 34.
Streitberger, Eric. *What Should We Be Teaching Them in High School Chemistry?* November: 35.
Talesnick, Irwin. (See *Idea Bank*).
Tamir, Pinchas and Donald B. Young. *Finding Out What Students Know.* September: 27.
Thornton, Kent W. and David C. Ashley. *Making a Game of Population Genetics.* March: 45. (Classroom Ideas)
Tobiason, Fred L. and Robert C. Olsen. *From Broken pH to Useful Redox Electrode.* April: 43. (Classroom Ideas)
Wahlstrom, Merlin W., F. Michael Connelly, Menahem Finegold, and Miriam Ben-Peretz. *TOTSI Matches Teacher to Curriculum.* February: 24.
Ward, M. Andrea and Michael W. Fox. *Are Science Fairs Fair to Animals?* September: 31. (Forum)
Watson, Fletcher G. and Gary C. Bates. *Measuring the Distance to the Moon by Parallax.* April: 32.
Watson, Fletcher G. *Science—The Basic.* March: 19. (Editorial)
Wilkinson, David T. *The Universe as Natural Laboratory.* February: 16.
Williams, Gregory F., Judith Goodenough, and John D. Palmer. *The Biological Clock: Regulating the Pulse of Life.* May: 31.
Williams, Richard L. and Donald C. Orlich. *Simulated Astro-Photography: A Sky for All Seasons.* May: 46. (Classroom Ideas)
Wooley, Jon K. *Measuring with a Gnomon.* April: 44. (Classroom Ideas)
Yarber, William L. *Answering Questions About Sex.* March: 20.
Young, Donald B. and Pinchas Tamir. *Finding Out What Students Know.* September: 27.
Young, Donald B. *Students Learn from Garbage.* February: 27.

Title Index

Ames Window Tunnel: Appearance vs. Reality. Richard W. Olsen. March: 47. (Classroom Ideas)
Answering Questions About Sex. William L. Yarber. March: 20.
Are Science Fairs Fair to Animals? Michael W. Fox and M. Andrea Ward. September: 31. (Forum)
Be Rigorous? . . . or Teach! Daniel Luzon Morris. December: 21. (Forum)
Beyond Words: A Closer Look at Cross-Cultural Communication. Cornelius Lee Grove. November: 23.
Biological Clock: Regulating the Pulse of Life, The. Judith Goodenough, Gregory F. Williams, and John D. Palmer. May: 31.
"Black Magic": Pepper in a Magnetic Field. John E. Peterson. December: 32. (Classroom Ideas)
Calculators in the Classroom. George Royce and James Shank. October: 23.
Cancer and the Environment: A Look at Nationwide Patterns. Patricia A. Newman. February: 20.
Caught in the Intrigue of Spider Orb-webs. Herbert W. Levi. January: 16.
Chemistry Scavenger Hunt. Frank Butcher. October: 46. (Classroom Ideas)
Cube for Teaching Structural Chemistry, A. Colin Kennard. September: 37. (Classroom Ideas)
Deciding the Future of Our Discipline. Thomas P. Evans. December: 28.
Declining Enrollments: Here Are the Facts. Where Are the Answers? J. Dudley Herron. January: 26.
Delaware Science Olympiad. Douglas R. Macbeth. December: 22.
Developing the Concept of Mass. Y. Shadmi and I. Chillag. September: 18.
Discovering Foraminifers on Ancient and Modern Beaches. P. B. Snyder. October: 44. (Classroom Ideas)
Does 'Suction' Pull? Allen R. Inversin. February: 38. (Classroom Ideas)
Earthquakes: Predictable Disaster? David M. Stewart. October: 34.
Endless Circle Investigation Introduces Processes of Science. Carolynn R. Sears. April: 45. (Classroom Ideas)
Energy Choices for Consumers. William T. Nolan. December: 32. (Classroom Ideas)
Energy is for the Birds, Too! William E. Spooner. September: 34. (Classroom Ideas)
Entropy and the Energy Crisis. Henry A. Bent. May: 25.
European Science Museums—A Summer Sampler. Raymond D. Perkins. April: 22.
Extended Field Studies in Secondary Science. David M. Riban. March: 23.
Finding Out What Students Know. Donald B. Young and Pinchas Tamir. September: 27.
Fizz Without Fizzle—Putting Method Into Madness. James H. Adams. February: 37. (Classroom Ideas)
From Broken pH to Useful Redox Electrode. Fred L. Tobiason and Robert C. Olsen. April: 43. (Classroom Ideas)
From the Little Acorn. . . . Michael J. Demchik. December: 31. (Classroom Ideas)
Getting Together: A K-12 Inservice Program. Gerald H. Krockover, Harold H. Jaus, Robert D. McFrye, and Leslie L. Ray. May: 35.
Habitats in Space. Gerard K. O'Neill and Ginie Reynolds. September: 22.
How Big is Your Share of the Ecosphere? Darrel B. Hoff. November: 42. (Classroom Ideas)
Idea Bank. Irwin Talesnick, editor. January: 40; February: 38; April: 46; May: 46; September: 38; October: 46; November: 46; December: 34.
Implicit Curriculum—Where Values are Really Taught. J. Dudley Herron. March: 30.
Individualization—What Is It Really? Peggy A. House. January: 20.
In Gratitude . . . 250 Years of Light. J. Joel Berger. March: 28.
Issues in Teaching Metric (SI). Richard E. Haney. November: 26.
Kinetics Teaching Model. William W. Sadler. November: 41. (Classroom Ideas)
Learning About the Mole. Jerome Silver and Lawrence G. Silver. May: 45. (Classroom Ideas)
Lesson Plan Tree. Jon Cobes and Shirley Heck. January: 40. (Classroom Ideas)
Letting in the Lateral: New Outlooks in Creativity. Alan J. McCormack. October: 30.
Life on a Log. John Kelly. September: 36. (Classroom Ideas)
Maintaining a Love Affair with Earth. Bob Samples. September: 30. (Forum)
Making a Game of Population Genetics. Kent W. Thornton and David C. Ashley. March: 45. (Classroom Ideas)
Measuring the Distance to the Moon by Parallax. Gary C. Bates and Fletcher G. Watson. April: 32.
Measuring with a Gnomon. Jon K. Wooley. April: 44. (Classroom Ideas)
Nomographs for the Number-Shy. Robert D. Smith. January: 38. (Classroom Ideas)
Paleoclimatology: Divining the Future From the Past. Patrick J. Egan. December: 16.
Personalized Self-Instruction at the Cambridge School. Jeffrey May. January: 22.
Physics of an Amusement Park. Philip A. Kuczma. May: 20.
Picking Up on Litter. Robert Lagemann and Paul B. Hounshell. March: 44. (Classroom Ideas)
Pistols Resolve the Difference: Mass and Weight Back to Back. Larry E. Shafer. October: 45. (Classroom Ideas)
Polliwogs in the Scheme of Things. Dianne Seale. September: 16.
Poor Teacher's Hand Vacuum Pump, The. Lawrence Kershnar and Madeline P. Goodstein. February: 36. (Classroom Ideas)
Practical Seismograph Tracks Tremors. James D. Lehman. November: 43. (Classroom Ideas)
Predator-Prey Simulation Game. Alan Mandell and Patricia Orr. May: 44. (Classroom Ideas)
Remote Sensing Simulation Activities for Earthlings. Gerald H. Krockover and Thomas D. Odden. April: 42. (Classroom Ideas)
Resounding Facts on Hearing Loss. Robert E. Apfel. November: 31.
Retelling the Barometer Story. Michael B. Leyden. March: 26.

Role of Universities in the Rise of Experimental Biology, The. Hamilton Cravens. January: 33.
Safety-wise. Myra Stechholz. November: 46.
Science: A History of Woman's Work. Agnes Kadar and Barbara Shupe. April: 38.
Science/Society Case Study. John W. and Elizabeth A. Moore, co-editors. *Biomedical Research* (by Duane Alexander) January: 24; *Wilderness Areas* (by Mark Riddle) February: 31; *Computer Forecasting,* March: 33; *Microcomputers,* April: 27; *Ethylene Oxide* (by Lucy T. Pryde) May: 40; *Arid Lands* (by Eric Eckholm) November: 28; *Saccharin,* December: 24.
Science—The Basic. Fletcher G. Watson. March: 19. (Editorial)
Scientific Anomaly and Raisins in the Fizz-Water. Francis X. Lawlor and Elizabeth P. Lawlor. April: 44. (Classroom Ideas)
"Sign" Language for Safety. Gerald C. Llewellyn and Hudson C. Jones. December: 26.
Simulated Astro-Photography: A Sky for All Seasons. Richard L. Williams and Donald C. Orlich. May: 46. (Classroom Ideas)
So You're Going To Be A Supervising Teacher. Karen Fitzpatrick. October: 22.
Students Learn from Garbage. Donald B. Young. February: 27.
Synergy: People Power for the Classroom. Jack Hassard. April: 18.
Teachers Who Care. Mary Budd Rowe. May: 37.
Teaching Bonding with Cuisenaire Rods. John R. Staver. September: 36. (Classroom Ideas)
Teaching for Safety. Donald F. Shebesta. October: 26.
TOTSI Matches Teacher to Curriculum. F. Michael Connelly, Menahem Finegold, Merlin W. Wahlstrom, and Miriam Ben-Peretz. February: 24.
Trace Elements: The Little Things That Count. Gary W. Evans. April: 29.
Universe as Natural Laboratory, The. David T. Wilkinson. February: 16.
What's It Good For? Julie P. Sanford and Frank E. Crawley. April: 25.
What Should We Be Teaching Them in High School Chemistry? Eric Streitberger. November: 35.
Which Freezes First, Hot or Cold Water? Robert K. James. January: 39. (Classroom Ideas)
Why Don't Blacks Pick Science? Mary Budd Rowe. February: 34.
Wingless Victory? Evolutionary Pathways. Wendy B. Hindin. March: 44. (Classroom Ideas)

NSTA Publications

POPULATION: The Human Dilemma
by Kathrine Mervine Fowler

The third in the NSTA Materials Guides series, this annotated bibliography of the most authoritative and accessible population literature contains teacher and student reading lists, a survey of curriculum materials, and a list of organizations involved with population issues.
1977, 102 pp. $3.50 471-14714

GAMES for the Science Classroom
by Paul B. Hounshell and Ira R. Trollinger

Designed to enhance the learning environment through the use of instructional games, this guide contains all the information necessary for choosing, ordering and preparing over 100 games in the biological, physical, earth/space, and general sciences, along with a brief summary of their rules.
1977, 252 pp. $3.75 471-14710

All orders must be prepaid except those on official purchase order forms. Prepaid orders under $10.00 add 50 cents postage and handling; over $10.00 add $1.00 postage and handling. Shipping and handling charges will be added to all billed purchase orders.
